## PerfectPrimer®

### Comprehensive Surface Prep Without Grinding

**PerfectPrimer®** The primer/sealer and complete floor prep system in one. It bonds virtually every Polymer modified cement, epoxy, paint or urethane, to clean, sound substrates, including: Wood, metal, cut-back adhesives, VCT, sealed concrete, paint, ceramic tile, masonry, epoxies, masonry, asphalt, bituminous roofing, and linoleum.

**What makes it unique?** PerfectPrimer® cuts prep time, seals in slab laitance and asbestos, reduces demolition hazards and mess, insures consistent coatings adhesion, and fills hairline cracks. PerfectPrimer® enables you to easily do projects that were otherwise too costly, impractical or impossible.

#### **BENEFITS:**

- ✓ Molecular adhesion ensures a strong bond to difficult surfaces
- ✓ Reduce surface prep, expense and project completion time
- ✓ No need to remove soy strippers, or grinding debris
  
- ✓ Makes perfect deck waterproofing, flashing and crack repairs
- ✓ Balances pH to reduce finish coat cracking and delaminations
- ✓ Eliminates the need to water prime, acid etch, and neutralize
- ✓ Protects top coatings from moisture loss and rapid drying
- ✓ Safely encapsulate, rather than grind asbestos and lead

#### **FEATURES:**

- ✓ Comes ready to use. Applies by brush, roller, or spray
- ✓ Base color: Bright white. Tints with water based tints
- ✓ Specified for use with decorative cements, and epoxies
- ✓ Bonds to high alkali and high fly ash concrete mixes
- ✓ Inexpensive. Materials cost about 35 cents per sf
- ✓ Comes ready to use. No mixing required
- ✓ Non-Toxic and environmentally friendly
