

## RubberDecky® Decorative Weather barrier coating system

**RubberDecky®** is the tough yet flexible, proprietary weather barrier coating specifically designed to provide protection for all concrete, foam and wood structures and surfaces.

**What is it?** Time tested resins, combine with ground breaking nano-technology, to create this laminate coating system.

**RubberDecky®** is reinforced with Polytex fabric to make seamless, waterproof joints, transitions, and flashings.

**RubberDecky®** is simply sprayed, rolled, or brushed directly onto any building or structure exterior. **RubberDecky®** bonds to, and performs consistently with specialty cements, resinuous, laminate and foam substrates.

**Protection for lightweight shelters**
